

Grand Theft Auto V - Boot Logo

How to install ?

Replace in the frontend.ytd file along the path:

Grand Theft Auto V\Mods\Update\update.rpf\x64\textures
\frontend.ytd

You can use any of your images. The main thing is that it be in the format (.png - With a transparent background)

When replacing the image, leave the default import settings (As specified in the Additional.png file)

WARNING

If you don't use the Mods folder then make a backup of the frontend.ytd file because if something goes wrong GTA will stop loading!

This method of replacing the logo works on any version of GTA
